

Sharps Disposal Request

The Aspetuck Health District recognizes that certain residents may utilize a sharps container for their safe disposal of used needles and/or syringes. These residents may have the need for assistance in the proper disposal of a used sharps container. Used sharps containers are federally regulated waste that incurs significant cost in disposal. The Aspetuck Health District will assist residents in disposal given that the resident incurs the estimated cost for disposal.

Used sharps containers will only be accepted as follows:

1. Aspetuck Health District only accepts used sharps containers from Westport, Weston and Easton residents. Photo identification is required.
2. Waste must have been generated only through residential, and not commercial, use.
3. Properly trained staff must be available to receive and package the sharps container for disposal. Residents are encouraged to call ahead and make an appointment, as front desk staff **cannot** accept the container.
4. The sharps container **must** be an OSHA-approved, properly labeled/colored container.
5. The container must be closed and the exterior surface clean.
6. Aspetuck Health District shall, in its sole discretion, reserve the right to refuse any sharps container.
